

# Cellulose Fiber Conference

Cologne, Germany, March 13-14, 2024

## Speaker

Elina Pesonen, New Bioproducts Manager, ANDRITZ

## Title

New opportunities in the circular textile ecosystem

## Bullet points

- Developements in textile recycling: market and challenges
- Latest technology insights in textile recycling
- Outlook: What's next?

## Abstract

The circular textile ecosystem is thriving. This is driven by sufficient capacities for innovative fiber-to-fiber-recycling, while reducing the incineration and landfilling of textiles to a minimum.

Sustainability is an essential part of the ANDRITZ business strategy and corporate culture. In the area of textile recycling, ANDRITZ is at the core of movement. The company provides industrially and economically viable solutions for recycling pre- and post-consumer textile waste made from natural and synthetic fibers and collaborates with internationally renowned partners. From automatic textile sorting, textile fiber preparation to mechanical and chemical recycling and combined processes, the company offers the full suite and expertise in textile recycling processes. Within its presentation, ANDRITZ will disclose its latest developments and experiences in industrial textile recycling.
