

## **Biosynthetics – Alternatives for Traditional Synthetic Fibres**

As the textile industry looks for sustainable solutions, biosynthetics are emerging as a promising alternative to traditional synthetic fibres. This presentation will introduce biobased synthetic fibers, highlighting their potential to reduce environmental impact. The session will cover various types of biosynthetics and explore their role in creating a more sustainable future for the textile industry. Emphasizing the importance of innovation, the talk will focus on the potential of these materials to replace fossil-based fibres and contribute to a circular textile economy.
